CTB(TMTM)-75

Tetramethylene Thiuram Monosulfide Bead Dispersion

Product Description:

CTB(TMTM)-75 is a 75% active bead form dispersion of tetramethylene thiuram monosulfide (TMTM). The binder is based on hydrotreated naphthenic oil. This product form is designed to offer the following advantages:

- The bead form is easier to handle than dusty powders and is free-flowing
- Disperses easily and quickly
- Provides better dispersion of the active ingredient throughout the batch
- Reduces loss associated with dusty powders
- Can be preweighed in batch inclusive bags to specific customer weights
- Can be customized with alternate binder system oils

Active Ingredient:

Tetramethylene thiuram monosulfide

Typical Properties:

CAS #'s

TMTM	75 ± 1%	97-74-5
Specific Gravity	1.27	

Appearance:

Form: Beady Powder

Color: Yellow

Odor: Slight Characteristic Odor

Application / Recommendations:

CTB(TMTM)-75 should be evaluated as a direct replacement for TMTM powder on an active ingredient basis. A reduction in the active ingredient requirement should be considered as a result of easier and faster incorporation and reduced waste.

TMTM is a secondary accelerator in multi-accelerator blends with thiazoles, guanidines, sulfonamides and dithiocarbamates. It has very good processing safety when compared to other thiurams with high curing activity and no discoloration.

Packaging:

Standard packaging is fifty (50) pounds per cardboard box. Other packaging options are available upon request.

Handling and storage:

TMTM may cause skin sensitization and eye/skin irritation. Exposure can result in an adverse reaction with the consumption of alcoholic beverages. The bead form reduces the dust potential and associated hazards. *CTB(TMTM)-75* must be stored in a cool, dry place. Maintain regular stock rotational practices. Partially used containers should be kept closed to minimize exposure and avoid contamination. Avoid physical contact. Wash with soap and water thoroughly after handling. If contacted in the eye, flush with water for 15 minutes and consult a physician. Please refer to the MSDS for additional information.
